HOW TO BUY BOOK OF DEMONS USING ETHEREUM

STEP BY STEP TUTORIAL

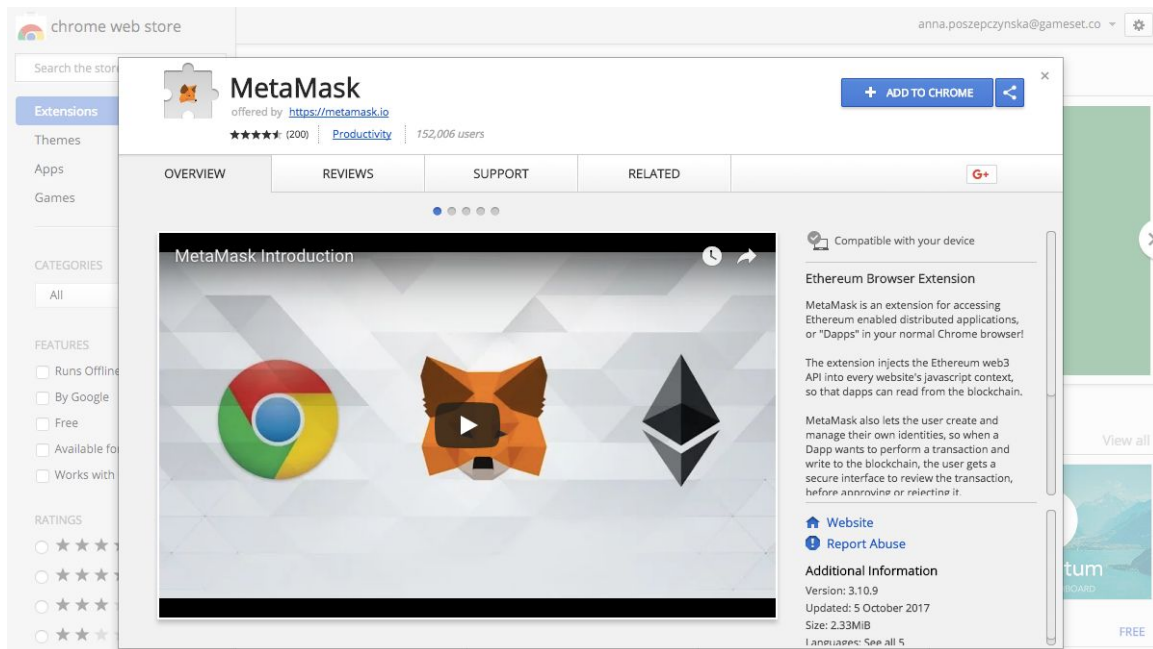

November 6th 2017

HOW TO PURCHASE OUR GAME?

Purchase of the game requires a MetaMask extension for your browser. MetaMask works for Chrome, Brave and Firefox and it connects you to Ethereum applications (called dApps) easily and securely. MetaMask is also a digital wallet, therefore you can store digital currencies in it and use it to buy stuff - like our game.

STEP 1 - GETTING METAMASK EXTENSION

Select browser (Chrome, Brave or Firefox), install [MetaMask](https://metamask.io) extension and set up your account by following instructions that will appear on the screen. **NOTE:** Remember to create secure password and to keep 'seed phrase' somewhere safe where only you will be able to find it ('seed phrase' is the only way to recover your account should you forget your password).

STEP 2 - TRANSFERRING FUNDS TO METAMASK WALLET

Buy ether (ETH) using one of the available exchanges, like [Kraken](#), [Bitstamp](#) or [Coinbase](#) and withdraw ETH from exchange (or digital wallet) to MetaMask account. MetaMask will give you your own address (it is like an account number for cryptocurrencies) to which you have to make a transfer from exchange or another digital wallet. **NOTE:** Make sure you are connected to Ethereum 'Main Network' and that you transfer sufficient funds - for the game purchase you will require approx. 18,5 USD worth of ether to cover the cost of the game and transaction fee (more on that below).

STEP 3 - PURCHASING THE GAME

Visit bookofdemons.gamenation.co website, confirm getting acquainted with terms of service by selecting relevant checkbox and press 'buy' button. Enter and submit your email address (on this address you will receive game key) and click 'pay'. After that MetaMask popup will appear and you'll be asked to 'submit' the transaction. **NOTE:** We will display current equivalent of 18 USD in ETH (cost of the game) however additional fees from cryptocurrencies transfer will apply (they are shown as 'gas limit' and 'gas price' on MetaMask popup). The higher the fees, the faster the purchase will be completed. By default we set up those parameters to achieve optimal value for money and the total cost for the purchase should be not greater than 18,5 USD worth in ETH. You can modify those parameters however please note that too low values might lead to rejection of the entire transaction. MetaMask will alter you in that regard.

The screenshot shows the website <https://bookofdemons.gamenation.co> with a dark, fiery theme. The main content area features a large red dragon-like creature. Text on the page includes: "FIRST GAME (AS FAR AS WE KNOW) RELEASED USING ETHEREUM PLATFORM", "Buy now and get: 10% discount (on Steam price), access to exclusive digital artbook (when released) and Gamenation token of appreciation.", "PAY USING METAMASK. PAY AT LEAST 18 USD = 0.0599240912 ETH (or more if you want to support us)", and a button "HOW TO BUY? STEP BY STEP TUTORIAL". A sidebar on the left contains navigation links: "WHY DO WE DO THIS?", "HOW DO WE DO THIS?", and "WHAT IS THE GAME ABOUT?".

Overlaid on the right is a MetaMask "CONFIRM TRANSACTION" popup. It shows the transaction details for "Book of Demon TEST" on the Main Network. The transaction amount is 0.059948 ETH (17.99 USD). The gas limit is set to 21000 UNITS and the gas price is 10 GWEI. The total transaction cost is 0.060158 ETH (18.06 USD). The popup includes "RESET", "SUBMIT", and "REJECT" buttons.

Once the entire process is completed, game key will be sent to the email address you've entered in the form. Here is a video showing the process: <https://youtu.be/hOEU3wlieGE>
